> Emergency Telephone Number: +64 21 930 795 (24 hours emergency only) National Poison Centre NZ (24 hours): 0800 POISON [764 766]

#### **Hazard Identification**

#### **Approval**

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO, Approval HSR002530, Cleaning Products Subsidiary Hazard Group Standard 2020). The substance has been classified as hazardous according to the criteria in the Hazardous substances (Hazard Classification) Notice 2020.

#### **GHS Classes Hazard Statements**

Eve dam cat 1 H318 - Causes serious eye damage.

Aquatic chronic cat 2 H412 - Harmful to aquatic life with long lasting effects. **SYMBOLS** 

# DANGER

#### **HSNO** classes **Hazard Statement**

H318 - Causes serious eye damage.

9.1C (chronic) H412 - Harmful to aquatic life with long lasting effects.

#### **Precautionary Statements**

P101 - If medical advice is needed, have product container or label at hand.

P102 - Keep out of reach of children.

P103 - Read label before use.

P280 - Wear eye protection.

P273 - Avoid release to the environment.

P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 - Immediately call a POISON CENTRE or doctor/physician.

P501 - Dispose of contents/container in accordance with local/regional/national/international regulation.

#### **Composition / Information on Ingredients**

Component	CAS/ Identification	Concentration
Xanthan Gum	11138-66-2	<0.5%
2-Butoxyethanol	111-76-2	<1%
Nonylphenol Ethoxylates	9016-45-9	1-3%
Methanol	67-56-1	<0.1%
Sodium carbonate	497-19-8	1-3%
Sodium metasilicate pentahydrate	10213-79-3	1-2%
Ingredients not contributing to GHS classes	mixture	balance

This is a commercial product whose exact ratio of components may vary. Trace quantities of impurities are also likely.

#### First Aid

#### **General Information**

If medical advice is needed, have product container or label at hand. You should call the National Poisons Centre if you feel that you may have been harmed or irritated by this product. The number is 0800 764 766 (0800 POISON) (24 hr emergency service).

Recommended first aid

facilities

Ready access to running water is required. Accessible eyewash is required.

**Exposure** 

**Swallowed** IF SWALLOWED: Call a POISON CENTRE or doctor/physician if you feel unwell. Rinse

mouth. Do NOT induce vomiting. Give a glass of water to drink.

Eye contact IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if

present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or

doctor/physician.

Skin contact

Inhaled

This product is non-irritating to skin. No further measures should be required. Generally, inhalation of vapours is unlikely to result in adverse health effects. If

coughing, dizziness or shortness of breath is experienced, remove the patient to fresh air immediately. If patient is unconscious, place in the recovery position (on the side) for

transport and contact a doctor.

#### **Advice to Doctor**

Treat symptomatically

#### Firefighting Measures

Fire and explosion hazards: Suitable extinguishing

substances:

substances:

Unsuitable extinguishing

Products of combustion:

Carbon dioxide, extinguishing powder or water jet. Fight larger fires with water jet or alcohol resistant foam.

Unknown.

Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Water.

May form toxic mixtures in air and may accumulate in sumps, pits and other low-lying

There are no specific risks for fire/explosion for this chemical. It is non-flammable.

spaces, forming potentially explosive mixtures.

**Protective equipment:** Self-contained breathing apparatus. Safety boots, non-flammable overalls, gloves, hat

and eye protection.

Hazchem code: NA

### **Accidental Release Measures**

Containment If greater than 1000L is stored, secondary containment and emergency plans to manage

any potential spills must be in place. In all cases design storage to prevent discharge to

storm water.

**Emergency procedures** In the event of a large spillage (>100L) alert the fire brigade to location and give brief

description of hazard.

Stop the source of the leak, if safe to do so. Wear protective equipment to prevent skin, eye and respiratory exposure. Clear area of any unprotected personnel. Contain using sand, earth or vermiculite. Do not use sawdust. Prevent by whatever means possible any

Product Name: Xcell RIP-IT Degreaser

# **Xcell RIP-IT Degreaser**

Safety Data Sheet

spillage from entering drains, sewers, or water courses. (If this occurs contact your

regional council immediately).

Clean-up method Use absorbent (soil, sand or other inert material). Rags are not recommended for the

clean-up of spills, as they may create fire or environmental hazard. Collect and seal in properly labelled containers or drums for disposal. If contamination of crops, sewers or

waterways has occurred advise local emergency services.

Disposal Mop up and collect recoverable material into labelled containers for recycling or salvage.

Recycle containers wherever possible. This material may be suitable for approved

landfill. Dispose of only in accord with all regulations.

**Precautions** Wear protective equipment to prevent skin and eye contamination and the inhalation of

vapours. Work up wind or increase ventilation.

#### Storage & Handling

Storage Avoid storage of harmful substances with food. Store out of reach of children.

> Containers should be kept closed in order to minimise contamination. Keep from extreme heat and open flames. Avoid contact with incompatible substances as listed in

Handling Keep exposure to a minimum, and minimise the quantities kept in work areas. See

section 8 with regard to personal protective equipment requirements. Avoid skin and eye

contact and inhalation of vapour, mist or aerosols.

### **Exposure Controls / Personal Protective Equipment**

#### Workplace Exposure Standards

A workplace exposure standard (WES) has not been established by WorkSafe NZ for this product. There is a general limit of 3mg/m³ for respirable particulates and 10mg/m³ for inhalable particulates when limits have not otherwise been established.

**NZ Workplace Exposure Stds**  Ingredient 2-butoxyethanol

Nonylphenol Ethoxylates

**WES-TWA** 

**WES-STEL** 25ppm, 121mg/m³ (skin) data unavailable data unavailable data unavailable

#### **Engineering Controls**

In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

#### **Personal Protective Equipment**

**Eyes** 

Protect eyes with goggles, safety glasses or full face mask. Avoid wearing contact lenses. Select eye protection in accordance with AS/NZS 1337.

Skin

Avoid any skin contact. Wear overalls, rubber boots and impervious gloves. Nitrile gloves are recommended. Protective gloves or suitably resistant material must comply with AS 2161. Replace frequently. Gloves should be checked for tears or holes before use. Protective clothing must comply with AS 2919, AS3765.1 or AS3765.2. PVC or rubber boots must comply with AS/NZS 2210.2 and selected and maintained in accordance with AS/NS2210.1. Remove protective clothing and wash exposed areas with soap and water prior to eating, drinking or smoking.

Respiratory

A respirator when airborne concentrations approach the WES (section 8). Respirators must have filters appropriate to the duty and comply with AS/NZS1716 and selected, used and maintained in accordance with AS/NS 1715. Use a respirator with a dust/mist filter. If using a respirator, ensure that the cartridges are correct for the potential air contamination and are in good working order. Fit testing and clear guidelines and training for use and maintenance of PPE are necessary.

#### **WES Additional Information**

#### 11. Toxicological Information

#### Summary

IF IN EYES: may cause eye damage.

#### **Supporting Data**

Eye

Acute Using LD50's for ingredients, the Acute Toxicity Estimate (ATE) (oral) for the mixture is Oral

>2,000 mg/kg. Data considered includes: 2-butoxyethanol 1414mg/kg (guinea pig), also aspiration toxicity, Nonylphenol Ethoxylates 2590mg/kg (rat), Sodium metasilicate pentahydrate 1280mg/kg (10% aqueous solution, rat), 2400mg/kg (10% aqueous

solution, mouse)

Using LD50's for ingredients, the Acute Toxicity Estimate (ATE) (dermal) for the mixture Dermal

is >2,000 mg/kg. Data considered includes: 2-butoxyethanol >2000mg/kg (guinea pig), ,

Nonylphenol Ethoxylates 2830mg/kg (rabbit).

Inhaled Using LD50's for ingredients, the Acute Toxicity Estimate (ATE) (inhalation) for the

> mixture is >5mg/L/4h. Data considered includes: 2-butoxyethanol 2.174 mg/L (rat, mist). The mixture is considered to be corrosive to the eye, because some of the ingredients

> > Product Name: Xcell RIP-IT Degreaser

present at >3% are considered eye corrosives.

The mixture is not considered to be a skin irritant. Skin

Chronic Sensitisation No ingredient present at concentrations > 0.1% is considered a sensitizer.

Mutagenicity No ingredient present at concentrations > 0.1% is considered a mutagen. Carcinogenicity No ingredient present at concentrations > 0.1% is considered a carcinogen. Reproductive / No ingredient present at concentrations > 0.1% is considered a reproductive or

**Developmental** developmental toxicant or have any effects on or via lactation.

**Systemic** No ingredient present at concentrations > 1% is considered a target organ toxicant.

Aggravation of None known.

existing conditions

#### 12. Ecological Data

#### Summary

This mixture is considered harmful towards aquatic organisms with long lasting effects. In all cases prevent the run-off of undiluted product to drains, sewers and waterways.

#### **Supporting Data**

Aquatic Using EC<sub>50</sub>'s for ingredients, the estimated EC<sub>50</sub> for the mixture is between 10 and 100

mg/L. Data considered includes: Nonylphenol Ethoxylates 1.3mg/L (96hr, Bluegill

Sunfish), 4.8mg/L (48hr, Water flea).

Bioaccumulation No data
Degradability No data

Soil No evidence of soil toxicity.

**Terrestrial vertebrate** See acute toxicity.

**Terrestrial invertebrate** No evidence of ecotoxicity towards terrestrial invertebrates.

**Biocidal** no data

#### 13. Disposal Considerations

**Restrictions**There are no product-specific restrictions, however, local council and resource consent

conditions may apply, including requirements of trade waste consents.

Disposal method Disposal of this product must comply with the Hazardous Substances (Disposal) Notice

2017 and the requirements of the Resource Management Act for which approval should be sought from the Regional Authority. The substance must be treated and therefore

rendered non-hazardous before discharge to the environment.

Contaminated packaging Disposal of contaminated packaging must comply with the Hazardous Substances

(Disposal) Notice 2017 clause 12. Ensure that the package is rendered incapable of containing any substance and is disposed in a manner that is consistent with the requirements of the substance it contained and the material of the package. If possible

reuse or recycle packaging.

#### 14. Transport Information

Land Transport Rule: Dangerous Goods 2005 - NZS 5433:2007

There are no specific restrictions for this product (not a dangerous good).

UN number:NAProper shipping name:NAClass(es)NAPacking group:NAPrecautions:NAHazchem code:NA

#### 15. Regulatory Information

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO). Approval code: HSR002530, Cleaning Products Subsidiary Hazard Group Standard 2020. All ingredients appear on the New Zealand Inventory of Chemicals NZIoC.

#### **Specific Controls**

Key workplace requirements are:

SDS To be available within 10 minutes in workplaces storing any quantity.

Inventory An inventory of all hazardous substances must be prepared and maintained.

Packaging All hazardous substances should be appropriately packaged including substances

that have been decanted, transferred or manufactured for own use or have been

supplied

Labelling Must comply with the Hazardous Substances (Labelling) Notice 2017.

Emergency plan Required if > 1000L is stored.

Certified handler Not required.

Tracking Not required.

Bunding & secondary containment Required if > 1000L is stored. Signage Required if > 1000L is stored.

Location compliance certificate Not required.
Flammable zone Not required.
Fire extinguisher Not required.

Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location.

#### Disclaimer

This SDS was prepared by Datachem LTD and is based on our current state of knowledge, including information obtained from suppliers. The SDS is given in good faith and constitutes a guideline (not a guarantee of safety). The level of risk each substance poses is relevant to its properties (as summarised in the SDS) AND HOW THE SUBSTANCE IS USED. While guidelines are given for personal protective equipment, such precautions must be relevant to the use. The likely HSNO and GHS classifications for this SDS have been estimated based on general information from the supplier (e.g., hazard, toxicological). This SDS is copyright Datachem and must not be copied, edited or used for other than intended purpose. To contact the SDS author, email info@datachem.co.nz or phone: +64 9 940 30 80.
